The International Conference on Computers and Their Applications (CATA) provides an international forum for presentation and discussion of research on computers and their applications. The CATA-2005 will feature contributed as well as invited papers concerned with theory, practice and applications. The topics will include, but are not limited to, the following areas:

- Algorithms  
- Data Mining and Knowledge Discovery  
- Artificial Intelligence  
- Digital Signal Processing  
- Biomedical Engineering  
- Expert Systems  
- Bioinformatics and Geoinformatics  
- Human-Computer Interface and Visualization  
- Compilers  
- Image Processing  
- Computer-aided Design/manufacturing  
- Information Systems  
- Computer and Network Security  
- Multimedia Applications  
- Computer Architecture and VLSI  
- Neural Networks  
- Computer Graphics  
- Operating & Distributed Systems  
- Computer Modeling  
- Pattern Recognition  
- Computer Networks  
- Programming Languages  
- Computer Simulation  
- Real-time Computing  
- Computer Practice and Applications  
- Robotics  
- Control Systems  
- Software Engineering and CASE  
- Data Communications  
- Text Processing  
- Databases

**Instructions to Authors**

A full paper (not to exceed 15 double-spaced pages), including title, author's name(s), affiliation, mailing address, telephone, fax and e-mail of the principal author should reach the Program Chair on or before November 26, 2004. Papers will be accepted only by electronic submission (PDF or Word format). The submitted manuscript should closely reflect the final paper as it will appear in the Proceedings, which will be a maximum of 6 pages (+2 pages with additional page charges) in ISCA double-column format. (see http://www.isca-hq.org/sample-isca-manuscript-format.pdf)
